Wellington Shines Bright in the Deloitte Fast 50

An impressive 11 Wellington businesses join the who's who of New Zealand's successful, innovative businesses in the [Deloitte Fast 50 2011](#). With Powershop taking out the number one spot, coupled with such a large Wellington representation making it to the top 50, this once again reinforces the region's positioning as the entrepreneurial and innovative business centre of New Zealand.

These 11 businesses range from easy to use online accounting software to one of the leading integrated kiwifruit companies in China to an industrial sector recruitment agency. Throw in a brewery, a vitamin and supplement supplier and beverage maker to the mix and you have a great range of successful businesses all stemming from the Wellington region.

The Deloitte Fast 50 index is an annual initiative which has been celebrating business growth in New Zealand for 10 years. The index ranks each business according to their percentage of revenue growth for the year.

With these 11 businesses making the fast 50 and with the impressive selection of businesses that came through the Bright Ideas Challenge 2011, Wellington really is proving to be a city full of successful and innovative entrepreneurs and business leaders.

The 11 Wellington Region businesses and the businesses to watch out for in the coming years are:
